

### 10.0 INITIAL TRAINING

Employees involved in the use of this Machinery Tag Out Program must receive training in the requirements of this program upon initial assignment. Pedro Quiroga is responsible for verifying that training is completed as required by this program.

Authorized employees will be trained in the recognition of hazardous energy sources present at the location they work, the type and magnitude of the energy available in the workplace, and the methods/means needed for energy isolation and control. Employees must be trained to recognize when the Machinery Tag Out Program is being implemented and understand the purpose of the procedure and the importance of not attempting to start up or use machinery or equipment that has been locked or tagged out. When tags are used, employees must be instructed in the following limitations of tags:

Tags are warning devices: they do not provide physical restraint that a lock out does. When a tag or lock is attached, it is not to be removed by anyone without authorization from the employee who placed it on the machine or equipment. They are never to be bypassed, ignored, or defaced.

Tags must be legible and understandable to be effective.

Tags and locks, and their means of attachment must be made of material that will withstand the working environment where the tags will be used.

Tags and locks must be attached securely so they cannot inadvertently be detached during use.

Tags evoke a false sense of security. They are only part of the entire Machinery Tag Out Program.

#### **Machinery Tag Out Program - Inspection Form**

This form will be used when inspecting the Tag Out/ Lock Out Procedure

Inspector's Name :

Date :

MACHINERY / EQUIPMENT INSPECTED / COMMENTS:
