

14.0 EMERGENCY ACTION PLAN

Purpose

To establish the policy and procedures regarding management's and employee's response to various emergency situations. Examples of an emergency are fire, tornado, earthquake, and bomb threat.

Overview

The procedures cover the following topics:

Fire Reporting and Response Evacuation

Bomb Threat

First Aid

Hazardous Material Spill

Robbery

Policy

EAFab Corporation has developed plans that address emergency situations that may arise in EAFab Corporation locations and which may threaten human health and safety, and damages EAFab Corporation assets.

Management is responsible for implementing the Emergency Action Plans. These Emergency

Action Plans will meet the following objectives:

Provide a means of notifying employees, customers and local authorities of an emergency situation.

Provide for a safe and orderly method of evacuation of employees and customers from

EAFab Corporation premises.

Account for all employees who occupied EAFab Corporation premises at the time of evacuation, should one occur.

Provide emergency first aid treatment or summon emergency medical assistance for injured individuals.

Provide training and needed information to those employees responsible for taking action in the event of an emergency.

Signs as required by ordinance, regulation, or law will identify emergency exits. Employees are required to be familiar with the location(s) of alarm pull stations and emergency exits.

Training on Emergency Action Plans will take place during new employee orientation, when changes occur in the action plans, and periodically as coordinated by Pedro Quiroga. If hazardous materials are involved, disposal must be done in compliance with federal, state, and local environmental laws.

Fire Reporting and Procedure:

If a fire alarm or alert is sounded or a fire is reported by an employee, regardless of the reason for the alarm or the severity of the fire, the following action must be taken immediately:

SAFETY AND HEALTH PROGRAM

1. If trained in the use of fire extinguishers, an employee may attempt to suppress a small fire, until relieved by the Fire Department or until it becomes apparent that the fire cannot be controlled by fire extinguishers.
 - a. Note: Employees should never attempt to control a fire, which endangers their health. They must immediately evacuate the area when it becomes apparent that the fire cannot be controlled or when conditions become more hazardous.
2. Immediately notify Pedro Quiroga of EAFab Corporation and all other management.
 - a. This notification needs to be done EVERY SINGLE TIME a fire extinguisher is used to attempt abating a fire.
3. If the fire cannot be handled by fire extinguishers, the standing management needs to notify immediately the Fire Department by dialing 911.
 - a. Give EAFab Corporation name, address, and area where the fire is located.
4. Management will assign an employee to wait for the fire department outside EAFab Corporation and direct them to the fire's location.
5. Management will start evacuation procedures for all EAFab Corporation.
6. Once outside EAFab Corporation, a manager will take a head count of employees to insure all were safely evacuated.
 - a. Double checks that all individuals are out of EAFab Corporation premises.
 - b. When one or more employees are unaccounted for, employees are not to re-enter the building to conduct a search under ANY CIRCUMSTANCE.
 - c. Notify the ranking fire or other emergency response official on the scene and their approximate location.

Evacuation

1. Telephones the local emergency agency (Fire, Police, Hazardous materials team, etc.).
2. Makes the following announcement on the public address system, "Ladies and Gentlemen. EAFab Corporation is being temporarily closed. Please leave by the nearest exit immediately. Thank you."
 - a. Make this announcement twice, and repeats it as frequently as needed.
3. Designates a safe area outside EAFab Corporation as a gathering point for all employees. Takes a head count of employees to insure all were safely evacuated.
4. Checks all areas of their respective departments, restrooms, and public areas to verify that employees and individuals are evacuated.
5. Once all employees are accounted, a manager will dismiss all non-essential employees.
6. If time and conditions permits it, a manager will secure all cash, checks, and charge documents in the safe.

Bomb Threat:

When someone calls and says there is a bomb in the building, the following steps will be performed:

1. The employee receiving the threatening call needs to keep the caller on the line as long as possible.

SAFETY AND HEALTH PROGRAM

- a. Asks them to repeat the message.
 - b. Tries to write down every word spoken by the caller.
 - c. Asks the caller where the bomb is located and when it will go off.
 - d. Tells the caller that the building is occupied and detonation of a bomb could result in the death and injury to innocent people.
 - e. Pays particular attention to background noises, such as music playing, engine noises, etc.
 - f. Listens to the voice, male, female, voice quality, accent, and speech impediments.
2. When the caller hangs up, do not hang up the phone!
 - a. Sometimes, phones can be traced back to the source.
 3. Immediately notify management and describe the threat.
 4. Calls the local Police or Fire Department to report the incident.
 - a. Follows all recommendations and instructions provided by either department.
 5. Inform either department that we are to start evacuation procedures and see if any of them has any suggestions to minimize the threat to employees.
 6. As the building is being evacuated, a quick search of the premises (if time permits) needs to be conducted for any suspicious looking device or package.
 - a. If one is found, DO NOT TOUCH IT.

First Aid

If an employee / individual is injured, the initial responsibility of management is to provide the needed first aid or arrange for emergency medical response or professional medical care.

1. A manager treats the injured individual using the EAFab Corporation first aid kit.
2. In the event an employee is injured beyond the means the First Aid Kit allows for treatment 911 must be called to allow professional individuals to perform a thorough assessment of the individual condition and the best route of action.

Hazardous Material Spill

Management will respond to incidental releases of hazardous substances when the substance can be absorbed, neutralized, or otherwise controlled at the time of release by employees in the immediate area or by maintenance personnel. If a large spill or fire occurs that is not controllable, Management will contact the appropriate local authorities, such as the Fire Department.

Robbery

In the event a robbery occurs, the main objective is to reduce the risk of injury to employees and individuals and to get the robber out of the building as soon as possible.

1. All employees need to remember that anything is replaceable. Life is not.
2. Be attentive and calm. Listen to the robber and do exactly what he/she asks you to do.

3. Do give up money as demanded.
4. Remain alert. Try to remember details of the robber's appearance, clothing, speech, etc.
5. If possible, watch the robber's method and direction of escape.
6. Expect foul/strong language. Expect to lie on the floor.
7. Do not make any sudden movements.
8. Don't overreact. Do not grab for the weapon or call for help.
9. Do not argue.
10. Remember that for every hero, there are a dozen martyrs.
11. After the robbery, write everything down.
12. Call the Police
13. Call Pedro Quiroga of EAFab Corporation
14. Have all witnesses write everything they can recall.
