

3.0 SAFETY AND HEALTH COMMUNICATION

Communicating with employees regarding health and safety issues must be a two-way street. It must consist of both employer-to-employee and employee-to-employer communications. Employees will be trained through the formal Safety and Health Program, new employee orientation, and training specific to new or current job assignments and/or hazards.

Reporting of Safety and Health Hazards

EAFab Corporation has a system for the employee to report a hazard or unsafe condition. The form on the next page will be used for reporting and documenting such hazards. The employee should also notify his/her immediate supervisor verbally of such hazard or condition.

The "Safety Suggestion Form" will be sent to the employee's supervisor or designated Safety Manager. A prompt and thorough investigation will be conducted of the situation.

Postings

As a routine part of the Safety and Health Program, postings required by state and federal law (for example, Safety and Health protection on the Job, state OSHA citations and responses, etc.) will be prominently displayed in employee areas.

Training

EAFab Corporation has training requirements designed to instruct each employee on general safety procedures as well as safety procedures specific to the employee's job. These training requirements are described in greater detail in the chapter entitled Safety Education and Training Program.

Employee and New Employee Safety Handbook

All employees will have access to the Employee Safety Handbook before they are to begin work and at the time of orientation. They are to read the handbook and acknowledge it by filling out form 2.0.1 Employee Safety Training Checklist. This page will be placed in their personnel record.
