

4.0 SAFETY COMMITTEE

The Safety Committee will be composed of rank and file employees. Pedro Quiroga is the appointed Safety Committee Chairperson. The Safety Committee will function as an advisory body to develop and recommend to EAFab Corporation Management matters of policy and procedure affecting administration of EAFab Corporation Safety and Health Program. The Committee will meet at a mutually convenient time, at the request of a member of the Committee, but not less than once every two months.

The Committee is responsible for:

- Reviewing and analyzing accident and property loss investigation reports for:
 - Accuracy and completeness (recommending follow-up investigation if necessary).
 - Provide recommendations for corrective action and provide consistency throughout EAFab Corporation operations.
 - Identification of accident problem or trend and determination of what order they should be given attention.
- Reviewing safety and property inspection reports, job safety analyses, supervisor's safety observation reports, and employees' suggestions for:
 - Possible changes in work practices or procedures.
 - Need for safety procedures.
 - Need for protective device or equipment.
 - Need for training.
- Developing practical safety and property inspection procedures and assisting in making inspections when requested by Pedro Quiroga.
- Keeping Managers informed of the progress of the Safety Program and informed as to the safety records of employees or other segments of EAFab Corporation.
- Assisting in developing the records and statistical data necessary to provide an accurate picture of EAFab Corporation safety problems.
- Identify unsafe work practices and conditions and suggest appropriate remedies. Ensure that employees and others (visitors, contractors, etc.) are informed about safety policies, training programs, injury risks and causation, and other health and safety-related matters. Maintain an open channel of communication between employees and management concerning occupational and environmental health and safety matters.
- Provide a means by which employees can utilize their knowledge of workplace operations to advise management in the improvement of policies, condition, and practices.
